

Continental Tires

ROAD TYRES

Ultra Sport

Train like the professionals

An attractive tread design and a choice of coloured treads can turn any race bike into a superb visual masterpiece. UltraSport tires make a stunning impact on every training ride and are ideal for newcomers to road biking. In addition to the UltraSport colour versions, the UltraSport SafetySystem tire incorporates a reinforced tread for extra protection against punctures.

Grand Prix 4000 S - schwarz, schnell, S! The new special edition of the Grand Prix 4000 with Black Chili Compound.

The all black Grand Prix 4000 S catches the eye with its big silver labels. Aggressive and posh alike it matches every high-end racebike perfectly. With the reduction to black and silver the Grand Prix 4000S does not clash with the frames' colour or rim stickers. S stands for sport, special and "schwarz" – the german term for black.

But the Grand Prix 4000 S can do more than just look good. With the new Black Chili Compound rolling resistance is reduced by 26%, grip is increased by 30% and mileage is increased by 5%.

MOUNTAIN TYRES

Explorer black pro tubeless 26 x 2.1

Explorer pro ust 26 x 2.10

The allround athlete

Exceptionally successful allround model with neutral handling characteristics and super rolling comfort. The effective EndlessEdge tread works very well in loose and muddy terrain and is combined with various carcasses, resulting in numerous versions. An absolute highlight of the Explorer Supersonic. With 460g, a true cross-country and marathon tire.

Speed king 26 x 2.1

The Speed King is designed for marathon racing. This tire offers low rolling resistance and secure grip at 510g. The tread of the Speed King masters various terrain, from fire road to moist singletrail. The shoulder knobs reach deep into the side for predictable handling on hard and loose pack giving you enough traction where others already skid and slide.

Double Fighter II 26 x 1.90

Double Fighter II 26 x 1.90 reflex

For sporty ATB and trekking bikes

The new Double Fighter is modelled on the successful concept of its predecessor. The centre with its light tread rolls smoothly and quietly on asphalt. Off-road, the shoulder's heavy tread provides the necessary grip. The Double Fighter II playfully combines high speed on the road with reliable grip on off-road terrain, so it is also suitable for MTBs that are used mainly on the street or for offroad in dry, summer conditions.

CITY / TREKKING

City contact 26 x 1.5 reflex wire bead

The chic and sporty city speedster

You do not dream of using the car as a means of transportation in the rush hour? Then the CityContact is just what you are looking for. Thanks to its slick tread, a lot of rubber comes into contact with the road surface on hard asphalt. Despite the enormous grip, the rolling resistance is minimal. Fit your bike with the 54 mm version, and this wide tyre will give you a totally new ride experience. Irregularities in the road are dampened, so your back and wrists are treated gently.
